EXPERIENCE

Trading Paints

2024 – Present | Full-stack developer

- Built an internal Backoffice platform for managing users, bans, support tickets and assets.
- Maintained and expanded MUI-based design system, implementing it across all platforms to ensure a consistent user experience.

Pastech

2024 – 2025 | Full-stack developer

- Integrated two existing systems into a single unified platform for Pastech, an AgTech company focused on pasture management.
- Upgraded and maintained the web platform while ensuring stability in a live production environment.
- Implemented new features across the stack, including backend APIs, frontend interfaces, and database changes.
- Developed and published a mobile app using React Native to both App Store and Google Play, designed for offline use in rural areas.

Makeway

2022 – 2023 | Full-stack developer

- Built a multi-tenant web platform for agencies and clients to manage projects, share files and track payments.
- Implemented payments for services and subscriptions with Stripe.

Trading Paints

2022 – 2022 | Frontend developer

- Built a proof of concept for a new version of the Trading Paints site.

Apeiron

2021 – 2021 | Backend developer

- Built and maintained the backend for Flowy (now CrossUp), a Tiendanube plugin that allows stores to offer upsells and cross-sells.
- Designed and implemented the API and database schema.
- Managed deployments and infrastructure setup on AWS.

EDUCATION

Universidad Nacional de Mar del Plata — Mar del Plata, Argentina

Ingeniería en Informática (Software Engineering) | 2020 – 2025

- Completed Software Engineering degree (5 years).
